
Editors & UI
editors — editors, tools, UI operations
windowmanager — windows, events, operators, jobs
blenfont — internal font system
blentranslation — UI translation/localization
calls operators / UI APIs
uses modeling tools
uses display/rendering
uses node tools
uses animation tools
Rendering & Graphics
render — rendering API and pipeline
draw — viewport drawing / EEVEE
gpu — GPU shaders, buffers, graphics functions
freestyle — non-photorealistic rendering
imbuf — image-buffer loading/manipulation
shader_fx — real-time visual effects
sequencer — video sequencer
Geometry & Modeling
geometry — generic geometry manipulation
bmesh — mesh editing/topology API
modifiers — object modifiers
Uses geometry operations
Uses nodes modifiers
Nodes & Compositing
nodes — node systems
compositor — compositor operations/execution
functions — lazy/generic function networks
uses core data / operators
Animation & Simulation
animrig — animation/rigging APIs
ikplugin — inverse-kinematics abstraction
simulation — cloth solver
Scripting & API
python — embedded Python + Blender Python API
uses scene/evaluation data
Core & Data Model
blenkernel — core data manipulation / kernel
blenlib — general internal utilities
makesdna — persistent Blender data structures
makesrna — runtime data access API over DNA
depsgraph — dependency evaluation
uses node/data definitions
uses evaluated scene data
uses Blender data
RNA / Blender data API
reads/writes Blender data
Data I/O & Asset Management
io — import/export libraries
blenloader — .blend loading/writing + undo
blenloader_core — core .blend binary file I/O
asset_system — assets, libraries and catalogs
